greenworks®

With Greenworks your possibilities are endless. Enjoy the work.

Greenworks is a fresh, rapidly growing brand selling innovative battery products designed to make gardening more enjoyable. You get zero fumes, no maintenance & no hassle. Just clean, strong battery power. Our products are versatile, easy to use and better for the environment.

Convenient

Greenworks has unusually strong voltage ranges, from 24V up to 60V. You can cut down a tree in the garden, edge your lawns or mow an entire city park. Your choice.

Simple

Greenworks equipment is designed to be lightweight, super easy and enjoyable to use. Charge one battery while using the other and keep going.

Smart

Switch to Greenworks and get zero fumes. Just great tools for today's fans of gardening.

Enjoy.

The versatile - 24V & 2x24V (48V)

The convenient - 40V

The powerful - 60V

Pressure washers

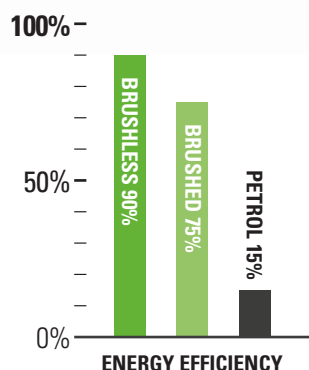

DigiPro brushless motors

Old technology like petrol engines reach up to 15% energy efficiency (the rest is wasted on heat generation). Modern battery powered motors are totally different. We normally use DigiPro brushless motors that reach a stellar 90% energy efficiency, and brushed motors that reach 75% energy efficiency for some of our products.

Welcome to the future.

BRUSHLESS MOTOR

46cm Lawnmower
GWGD40LM46SPK2X

Batteries are the future, and some are more powerful than others.

At Greenworks we have been developing battery powered equipment from day one. 18V is the industry standard. But we don't do standard. Our equipment delivers true performance in every voltage range – from 24V to 60V.

One battery for all your tools

Use the same battery for all equipment in the same voltage range.

Two batteries makes you unstoppable

Charge one while you use the other.

Strong, stronger, strongest

Our equipment comes in 24V, 40V & 60V.

Developed together

A battery-powered device is only as good as its motor. So we develop the motor and battery together for optimum results.

Lithium-Ion rechargeable batteries

- Always get the power you expect
- Always get maximum energy capacity
- Rapidly charge one battery while you use the other

It's easier with a battery

1. Ready to start
2. Low noise and low vibration
3. Low weight
4. Low running cost
5. No maintenance
6. No direct emissions
7. Energy efficient
8. Environmentally friendly

What range suits your needs?

Strong power ranges, from 24V to 60V. Use the same Lithium-Ion battery for all equipment in the same voltage range.

The versatile

24V range for home and garden

**Mowers
Blowers
Trimmers
Chainsaw
Pole saws
And more**

29 tools on the same powerful 24 volt battery. You get one cell more than most power tools. This means even more power, longer runtime, higher speeds, greater efficiency and less noise. The products are lightweight so you can enjoy the work for as long as you like.

The convenient

40V range for gardening

**Mowers
Blowers
Trimmers
Chainsaw
Pole saws
And more**

This is the everyday range that lets you mow the lawn, trim the hedge, cut branches, clean the deck or inflate tyres. The products are lightweight and some use a brushless motor. A 40 volt lawn mower could mow up to 900m2 with a 4Ah battery in one go.

The powerful

60V range for large gardens

**Mowers
Blowers
Trimmers
Chainsaw
Pole saws
And more**

This is the range for large, hilly gardens with features like cruise control and boost mode. All tools are lightweight and the majority use Greenworks DigiPro brushless motors. A 60 volt lawn mower could mow up to 1300m2 with a 6Ah battery in one go.

One Battery System

Fits all products in the same voltage range

24V - The versatile range

40V - The convenient range

60V - The powerful range

Pressure Washers

The versatile 24V & 2x24V (48V) range

Do the job easier with
all round tools and gardening

New for 2020...

If you want a high-performance cordless lawnmower, the 48V range could be the answer; using two 24V batteries in parallel to deliver 48V of power at the fraction of the weight of Petrol & without the inconvenience of an electrical cord.

Both of these batteries can then be used with all 24V products, giving you the choice and flexibility you need.

This is the all round range with anything from hedge trimmers to chainsaws. You can use all 9 tools for gardening, all on the same powerful battery. With 24 volt you get one cell more than most power tools. This means even more power, longer runtime, higher speeds, greater efficiency and less noise. The products are lightweight so you can enjoy the work for as long as you like. And thanks to low noise, you get the chance to actually hear the birds sing while you're working outside.

The 24V Li-Ion battery
powers all 25 tools
in the range.

A woman with short blonde hair, wearing sunglasses, a red and white striped long-sleeved shirt, black pants, and black gloves, is using a green and red Greenworks 40V Hedge Trimmer to trim a large, dense green bush. The scene is set outdoors in a grassy area with trees and a building in the background. The lighting is warm, suggesting late afternoon or early morning. The trimmer has a red cutting head and a green body with a battery pack at the bottom.

40V Hedge Trimmer
GWG40HT61

With Greenworks your possibilities are endless. Enjoy the work.

The convenient 40V range

For gardening and outdoor life

This is the everyday range that let you mow the lawn, trim the hedge, cut the branches, clean the decking, inflate tyres and footballs. The products are lightweight and so silent you can even hear the birds singing while you're working. Four out of 15 tools use Greenworks DigiPro brushless motor technology. This means more power, longer runtime, higher speeds, greater efficiency and less noise. A 40V Lawnmower could mow 400m² 700m² with a 2Ah battery, and 600m² 900m² with a 4Ah battery in one go. You can use the same 40V battery for all your 40V tools.

The powerful 60V range

Made for large gardens

This is the range for large, hilly gardens with features like cruise control and boost mode. 60V is equivalent to petrol power in green drive, and the products are lightweight and so silent you can even hear the birds singing while you're working. All ten tools in the range use Greenworks DigiPro brushless motor technology. This means more power, longer runtime, higher speeds, greater efficiency and less noise. A 60V Lawnmower could mow 350m² 450m² with a 2Ah battery, and 700m² 900m² with a 4Ah battery in one go. You can use the same 60V battery for all your 60V tools.

GWG40

- Compact design with onboard hose reel and telescopic handle for convenient usage and storage
- Aluminium pump head with stainless steel pistons for longer pump life
- Foam nozzle and rotary nozzle for stubborn dirt
- Anti-drill and quick release coupling on the spray gun

Included Accessories

- High-pressure gun
- Fixed fan jet nozzle
- Water filter
- High-pressure detergent nozzle, 450 ml
- 6 m high-pressure hose

MAX FLOW RATE
420 L/H

TANK SIZE 20 L

Power	1,900 W
Max. pressure	135 bar
Weight	13.20kg

145bar Pressure Washer

GWG50

- Compact design with onboard hose reel and telescopic handle for convenient usage and storage
- Aluminium pump head with stainless steel pistons for longer pump life
- Foam nozzle and rotary nozzle for stubborn dirt
- Anti-drill and quick release coupling on the spray gun

Included Accessories

- High-pressure gun
- Fixed fan jet nozzle
- Water filter
- High-pressure detergent nozzle, 450 ml
- 8 m high-pressure hose

MAX FLOW RATE
440 L/H

TANK SIZE 20 L

Power	2,200 W
Max. pressure	145 bar
Weight	13.95kg

180bar Pressure Washer

GWG70

MAX FLOW RATE
660 L/H

TANK SIZE 20 L

- SRT Smart Reponse Technology
- Compact design with onboard hose reel and telescopic handle for convenient usage and storage
- Aluminium pump head with stainless steel pistons for longer pump life
- Foam nozzle and rotary nozzle for stubborn dirt

Included Accessories

- High-pressure gun
- Adjustable 5-in-one nozzle
- Water filter
- High-pressure detergent nozzle, 450 ml
- 10 m rubber armed high-pressure hose

Power	3,000 W
Max. pressure	180 bar
Weight	22.00kg

NOTES

This image shows a full page of blank, lined paper. It features approximately 28 horizontal blue or grey lines spaced evenly apart, typical of notebook paper. The lines extend across the entire width of the page, leaving small margins at the top and bottom. There are no vertical lines, text, or other markings on the page.

All stated times are “up to” measures and are measured under load during safe and controlled ways of working. This means no stressing of the products to extreme limits. Light conditions means that the product is running on 60–80 % of max rpm. Hard working conditions means the product is working on 80–100 % of the rpm register. The status of cutting equipment and way of working with the product will affect the runtime dramatically. Therefore it is important to always keep your equipment with sharp cutting equipment.

All stated charging times require that the battery has sufficient temperature and charging is done in line with the instructions from the operators manual.
