Completes 110 years

Masport is a leading manufacturer and distributor of consumer outdoor power equipment, exporting to over 40 countries worldwide.

Masport have been delivering a range of quality lawn and garden products since the 1930's and have continued to maintain an ever growing presence in the UK for 50 years.

The Rotarola model which we see today is not that far away from its predecessor back in 1968, in terms of pure 'rugged' build, performance, quality, and operator's ease of use. The resulting lawn finish is outstanding.

Benefits of owning a Masport

Masport mowers have been designed to meet the demands of the toughest of lawns.

The climate in New Zealand can be warm and wet...not to dissimilar to British weather conditions, and as such Masport are very much in tune with consumer's needs. Damp and lush grass growth brings out the best in Masport rotary mowers.

Aided by a wide 'rear ejection' channel to ease the flow of cut grass into the catcher, Masport rotary mowers remain industry leaders in performance.

Many of the models are fitted with 'Smart Chutes' allowing you to easily switch from collecting to side or rear discharge. You can mulch with many of them also. 'Quickcut', Bar Blade or Cylinder cutting systems give you a varied range, and versatility you come to expect from an industry leader.

You demand high performance, to suit your lifestyle and budget.

Masport delivers.

- Low Vibration
- Quickcut Blade System
- Consumer & Professional Products
- Roller Range
- Steel or Alloy Decks

Machines Features

BLADE SYSTEMS

MASPORT BAR BLADE

One piece bar blade for efficient cutting and mulching.

MASPORT QUICKCUT®

The Masport Quickcut® blade is a top quality - specially designed blade for cutting and mulching. These blades have a swing back design which protects the crankshaft from damage if the blades hit a solid object.

MASPORT QUADCUT

Masport mowers such as the MSV® range are fitted with a specially designed four blade disc system, great for catching due to increased airflow.

The Rotarola Range

The Rotarola is and has always been the flagship of the Masport line-up, and the 7-model range gives you plenty of options to suit your lawn and your pocket.

Starting with an 46cm/18" push, moving through 46cm/18" self-propelled models, powered by a choice of engines, the Briggs and Stratton Ready Start, Honda GCV, the NEW Loncin OHV and the fabulously 'user friendly' Briggs and Stratton INSTART, which features a Lithium-lon battery, giving you 'push button' electric start technology.

It doesn't stop there. For the larger garden, Masport have the 54cm/21.5" self-propelled Rotarolas.

Masport has the Rear Roller Rotary Mower for you.

Why a Rear Roller Rotary?

The Rotarola gives you the excellent 'striped' finish of a roller mower, combined with the versatile efficiency of a rotary mower. Another great feature- The rear roller (which is steel), allows you to mow over the edge of your lawn, without falling into your flower beds! The roller acts as a stabiliser.

When mowing in wet/damp conditions, grass collection is not hindered. The full-width rear ejection channel really allows that damp grass to 'fly' into the catcher. And don't worry about the moisture 'rusting away' the machine body. It's rustproof alloy! You can also use the 46cm/18" models, without the catcher. The rear flap allows the grass to discharge to the rear of the machine.

Other features include the 'over centre' cam-lock handles, making the handles easy to fold for storage or transportation. The 'Quickcut' blade system really is the 'icing on the cake'. Swing Tip Blades and a steel 'lugged' blade boss give you engine protection, without compromising air flow, which optimises collection. Some of the key features of the Masport Rotarola that have led to gardeners from all sectors of lawn-care to use Masport mowers for the last 50 years.

Cylinder Mowers

For the discerning gardener, there is nothing quite like a finely cut, manicured lawn - and that's where the Masport Olympic Cylinder mower comes in. Unlike a rotary blade - which relies on the speed that the blade rotates at, to chop the grass on impact - the cylinder mower uses a revolving cutting cylinder which spins against a fixed 'bottom' blade (which runs the width of the machine).

A 'scissor action' is created between the cylinder and fixed blade, 'slicing' the grass neatly.

Combine this precision cutting with a power driven rear roller (to give you that 'Wimbledon' stripe effect), with the ability to achieve very low cutting Heights, and your results are a stunning professional finish.

Masport gives you the choice of 4 models, all with a super lightweight high density, high capacity plastic grass catchers and 'split' rear rollers for ease of manoeuvrability.

- Olympic 400 For the smaller/medium sized lawn
- Olympic 500 For the larger lawn
- Olympic 660 For extra-large lawn
- Olympic Golf 500 Multi-bladed cylinder/shaver blade for golf/bowling green

- 70 Litres Catcher
- Self-Propelled
- Split steel rear roller and single steel front roller

10 BLADED GOLF

Chipper/Shredder & Garden Equipment

- OHV IC, 6HP
- Reduces material to at least 20% of its original volume
- Weeds are reduced to a fine mulch so they can't regenerate
- Branches up to 50mm can be fed through the side chipper tube
- Larger branches up to 65mm can be fed through the optional chipper side chute, if fitted
- Choice of two grates. Standard model for fine mulch, the other (an optional extra) is designed to avoid clogging with damp leaves and foliage
- Pneumatic tyres Easy Transportation

Chipper/Shredder 6.5xl

The Masport garden shredder is ideal for the successful recycling of organic garden waste. It operates in two ways:

Shredding - Utilises a horizontal flail arrangement with a total of 9 flail blades, reducing garden foliage to a fine mulch

Chipping - Breaks down thicker branches up to 50mm creating a fine mulch that is perfect for composting.

- 127cc Briggs & Stratton 3.5HP IC horizontal shaft engine
- Sturdy shaft drive with worm gearbox transmission
- Lightweight 37kgs, this allows for easy handling and storage 430mm tilling width standard
- 280mm tilling width without outside tines
- Simple controls and rugged construction
- Garden aerator, lawn edger and cleaning brush accessories available as optional extras

Home Gardener

For over 20 years gardeners enjoyed the lightweight versatility of the Masport Home Gardener tiller. It has been rebuilt to the original specifications so that a new generation of gardeners can enjoy the pleasure of backyard flower and vegetable growing.

- Briggs & Stratton 127cc 3.5HP horizontal shaft IC engine
- 240 mm Bar blade
- Ten position Height control
- Vertical cutting range: 4cm above ground to 6.5cm below ground
- 150mm front and 200mm rear ball bearing wheels
- Fold down handles
- Weight: 28.34kgs

Lawn Edger

This machine is ideal for the manicured straight edged lawn finish.

The Masport petrol edger helps you achieve neat and tidy lawn and path edges with ease.

With double front wheels and a wide stance design the edger is very stable, making it easy to use and allowing the operator to be more precise with their edging.
