Getting started in the garden

Whether you are starting a new garden from a fresh plot or are developing an existing garden you have acquired, it will always involve a certain amount of care. To help you be as efficient as possible in the garden you will require the right gardening tool for the right job. Many of these core tools will be in constant use so choosing good quality, reliable equipment that is lightweight and comfortable in use is important.

An introduction to multi-change® Gardening without the backache!

Our multi-change® range is specifically designed to be lightweight and comfortable to use.

The 'every tool head fits every handle' multi-change® range comprises of a selection of 11 handles of different lengths (to suit your height or the task at hand) and over 50 tool heads to cater for any type of gardening and household task.

When you find a handle that you love, you can choose from our comprehensive selection of tool heads and just 'click' them together to get any gardening job done with a straight back. When you have your handle, you can keep adding to your collection of tool heads as it only takes a quick press of a button to release one tool head and swap it for another.

A system to suit all seasons

The multi-change® system will help you achieve your gardening goals whether it's spring, summer, autumn or winter. Simply click off and on to adapt your tools for whatever job the season demands.

**35 YEARS
GUARANTEE**
MADE IN GERMANY

All products in the multi-change® range manufactured from 2018 onwards come with a 35 year guarantee against defective material or assembly under normal usage.

multi-change® Handles

A handle is the starting point for any multi-change® collection, whether it's for general use or for a more specific application.

All of our lightweight metal handles are made using recycled aluminium and each handle has a fixed seat, guaranteed to withstand vibration and absorb shock when in use.

- Flexible frame protects fish and makes collection easier

35 YEARS GUARANTEE
MADE IN GERMANY

multi-change® Sweeping

The multi-change® Sweeping range includes products for both everyday tasks and specific cleaning requirements.

WOLF-Garten has developed the X-tra clean series of brooms to help clean floors faster and more thoroughly. This is made possible by an X-shaped overlapping arrangement of the bristles made from durable materials, each tailored for specific cleaning tasks. The result is quick and efficient sweeping in both wet and dry conditions. In addition, the round shape of the brush body allows you to easily reach corners and narrow spaces without damaging the edges of your furniture.

BKM	Dustpan and Small Handle
Width	25cm
Trade Pack	5

- Dustpan with broad plain
- Adjusts to 150° due to integrated hinge mechanism
- Includes ZMo15 handle

Secateurs

WOLF-Garten offers a wide range of secateurs including bypass for new stems and anvil for tougher, woodier growth.

Bypass secateurs work on a scissor-like cutting action with one blade 'bypassing' the other. They are ideal for cutting growth which is younger (up to 2 years old) as they provide a very clean cut, essential for maintaining a healthy plant or shrub. Little pressure is required in pruning of this nature so the secateurs themselves are light in weight.

For older thicker stems, it is best to use an anvil secateur to reduce the strain on the wrist and hand. With anvil secateurs the blade closes against a softer metal on the lower jaw, this does not produce such a clean cut as a bypass secateur, which is why it is not suited to young stems but more to older wood where the cleanliness of the cut is not so important. Always consider the density of the wood you are cutting and ensure you have the right tool for the job; you may want to upgrade the cutting tool to avoid unnecessary strain on the hand.

RREN	Bypass Secateurs
Cutting Diameter	19mm
Trade Pack	10

- For delicate and precise pruning
- Suitable for both left and right handed use
- Coated blades for non-stick pruning and easy cleaning

RR2500	Bypass Secateurs

- For tough, woody pruning
- Robust aluminium handle with smooth plastic insert
- Integrated spring
- Ergonomically designed blade to avoid over extension of hand
- Easy to replace anvil block

10 YEARS
GUARANTEE
MADE IN GERMANY

Loppers

A simple rule for choosing the right lopper is bypass for younger branches and anvil for harder or dead wood. It is especially important to ensure you use the right tool for the job when cutting greener branches as the bypass lopper allows for a more accurate cut without crushing the branch.

Be sure that the lopper will be able to make one clean cut, otherwise you cause multiple wounds to the branch that can attract insects or disease more quickly. The longer the handles, the more leverage you will have when cutting, making it easier to achieve a clean cut. Telescopic loppers are available in the WOLF-Garten range to reach taller bushes.

RR650 POWER Cut Bypass Lopper

Cutting Diameter 40mm

LAWNMOWERS

WOLF-Garten provides a wide array of powerful, lightweight and extremely manoeuvrable lawnmowers to help maintain a beautiful lawn. The range includes electric models with capabilities to either collect clippings in a grass bag or mulching them back into the lawn. WOLF-Garten lawnmowers feature technological innovations to help keep lawn mowing easy and enjoyable.

CUT, COLLECT, MULCH

Flexible mowing systems offer a choice between cutting, collecting or mulching. The CCM-System integrates all these functions with timeless design and constant technological innovation.

The advantages of mulching are:

- It saves time and effort as the collection bag doesn't need emptying
- No disposal of clippings
- The clippings provide the lawn with moisture and valuable nutrients

- 20m cable supplied

A400E	1800W Electric Mower
Cutting Width	40cm
Trade Pack	1

- Plastic chassis
- Bail arm switch
- Soft grip handle
- CCM System
- ACC System
- Central 6 step cutting height adjustment 25 - 75mm
- Weight 18kg
- Cable guide "Flick-Flack®"
- Grass bag capacity 45ltr
- High Wheels
- 20m cable supplied

Advanced Cut and Collect System (ACC)

The WOLF-Garten ACC system has been designed to generate a strong airflow to straighten grass stems before cutting. This ensures a beautiful even cut and accelerates the cuttings into the grass bag for efficient clipping collection.

Shredders and Scarifiers

The WOLF-Garten universal shredder converts garden waste into valuable compost or mulch. The cut and crush action of the cutting system can convert even woody waste up to 40mm diameter into quality compost, quickly and quietly. Processed material can be used as mulch on borders and beds.

The WOLF-Garten scarifiers remove organic matter from around the grass roots and tidy up any straggly lateral growth. When this layer of thatch and moss is removed, vital nutrients, oxygen and water can penetrate the soil to be absorbed by the grass roots, encouraging lawn re-growth.

VS302E	1200W Electric Scarifier
Working Width	30cm
Trade Pack	1

- 5 height positions
- 35 litre grass bag
- Folding, height adjustable handle with soft grip
- 20m cable supplied
- Optional moss rake available

Bound by tradition – the story of WOLF-Garten

It all began with minor inventions that put the WOLF company on the map. One of the first achievements was the draw hoe, a tool designed to make agricultural work easier. Gregor Wolf developed it in 1927 in the ironware factory that his father August Wolf had founded together with his sons Gregor and Otto in 1922. The idea first came to him on his way home from work, while observing local farmers working their fields.

This initial innovation was followed by many others. In 1953 the WOLF Geräte GmbH was the first company in Europe to offer lawnmowers with rotating blades. In 1958 WOLF introduced the first electrical lawnmower to the European market prior to developing the world's most silent petrol lawnmower in 1975.

Over the years, the company has developed a clear and distinctive profile in the "green area". The WOLF Geräte GmbH of the early era became WOLF-Garten, an established company known for their key skills regarding product quality, product diversity and gardening know-how with an expertise in environmental awareness. The focused research and development work in its own research institutes was just as important for their growth as the development of new market segments.

Later global innovations helped give the brand the distinctive wolf face on a red background. WOLF-Garten is highly successful with its innovative multi-change® system that has guaranteed top quality for more than 35 years and confidently provides a warranty for all associated products. The development of innovative seed and fertiliser products, as well as the extension of its lawnmower range have demonstrated the strength and diversity of the company. WOLF-Garten was one of the first companies to offer a wide range of versatile lawn tractors to the European market. Handheld all-season tools and special devices for winter use round off the WOLF-Garten range.

Numerous quality awards and excellent results in comparative testings document why the trust of novice as well as professional gardeners throughout Europe is justified by the quality and innovative strength of WOLF-Garten.

Making garden work easier, more enjoyable and more environmentally compatible will guide our corporate future. This goal is fully supported by our employees. It is them who ensure the familiar reliability, the high quality standard of the company and the inexhaustible innovative drive of WOLF-Garten.

To assure you of the quality of our tools, all products in the multi-change® range manufactured from 2018 onwards come with a 35 year guarantee for manufacturer's fault (not wear and tear). The remainder of our garden tools carry a 10 year guarantee, whilst our electric range comes with a 3 year guarantee.
