## MAKE MOWING A CLASSY AFFAIR

With our lawn tractors, you get a very special experience when maintaining your lawn. With proven transmissions and cutting widths of up to 125 cm, you will find the right machine for every requirement. You will feel how comfortable mowing is as soon as you get behind the wheel. You'll be in safe hands with the lawn tractor

which makes mowing a truly pleasurable experience. Simply climb on, turn the key, put your foot on the pedal, and enjoy yourself! Take lawn mowing to the next level with lawn tractors engineered in Germany and made at our factory in Austria.

engineered in  
**GERMANY**   
made in  
**AUSTRIA** 

## ENGINEERED IN GERMANY MADE IN AUSTRIA

**QUALITY FOR LIFE** AL-KO appliances are developed with precision in Kötz, in the Swabian region of Bavaria and subjected to rigorous testing. With typical German efficiency, our research and development engineers create pioneering garden tools from hundreds of individual parts. Our core product groups have been produced in tranquil Obdach in Styria, Austria since 1966: With the flexibility and security of an owner managed company, our goal is to meet the requirements of our customers every time.

**INNOVATIVE AND DURABLE SOLUTIONS** With our quality promise "Engineered in Germany & Made in Austria", we are developing innovative solutions for our lawn tractors, ensuring that the machines are as comfortable and durable as possible. All our lawn tractors feature our patented C-profile frame, offering durable operation, as well as our patented freewheel mechanism to decrease gearbox wear and tear. The innovative design, combined with high quality components such as the electromagnetic blade brake clutch, the foot-operated hydrostatic transmission and extremely precise steering, put our lawn tractors in a class of their own.

**GERMANY**  
KÖTZ

**AUSTRIA**  
OBDACH

**HIGHEST STANDARDS** Materials of the highest quality, ingenious technology, perfect ergonomics and a sure feel for form and detail are the unmistakable hallmarks of our garden tools. The rigorous quality requirement that characterises the AL-KO brand is guaranteed through our comprehensive range of technologies that is consistently designed and implemented by AL-KO development engineers, designers and technicians – from the initial design and prototype construction right through to the end product.

**SUSTAINABILITY** We see it as our responsibility to integrate economic, ecological and social sustainability into our business activities and continuously optimise our processes. We make a significant contribution towards this with the local added value at our production plant in Styria, Austria. Our wide ranging investments in recent years have allowed us to save up to 285 tonnes of CO<sub>2</sub> per year in production and thus reduce our ecological footprint.

## MOWING WITH GREATER EFFICIENCY

## MAXAIRFLOW *technology*

Our lawn tractors offer side discharge, rear discharge and mulching functions. The side discharge function is particularly useful if you need to cover large areas of grass in a jiffy. The highest mowing quality is achieved with regular mulching, whereby the grass is deposited on the lawn in fine clippings. If the grass cuttings need to be collected, our tractors with rear discharge function are the ideal choice. Extra high, extra large - that's the approach taken by MaxAirflow technology for our rear discharge tractors when it comes to increasing efficiency compared with standard ride-on mowers.

# BATTERY RIDERS

LOW-EMISSION MOWING  
WITHOUT THE EXHAUST

## POWERFUL TWIN BLADED LITHIUM-ION BATTERY RIDER FOR LOW-EMISSION MOWING

Ride-on mowers, also known as riders, are comparable in terms of performance to that of classic lawnmowers. In these models, the drive element is fitted under the seat, which is where the name “Rider” comes from. The large lithium-ion battery ensures long-lasting operation and increased comfort through quiet operation. A total of three electric motors are driven by the powerful battery: one for the wheel drive and one for each cutting blade. A handy feature is the adjustment of the blade speed in difficult conditions. Furthermore, the ride-on mower is able to

reverse mow at full speed. A high degree of ergonomics is achieved by means of the easy to use controls, the adjustable seat, the anti slip steering wheel and the complete absence of engine noise and exhaust gases. The large grass collector means you can mow the grass for longer before needing to empty it and also features a fill level indicator with acoustic signal, which sounds once the box is completely filled.

**R 85.1 Li**
**PREMIUM**

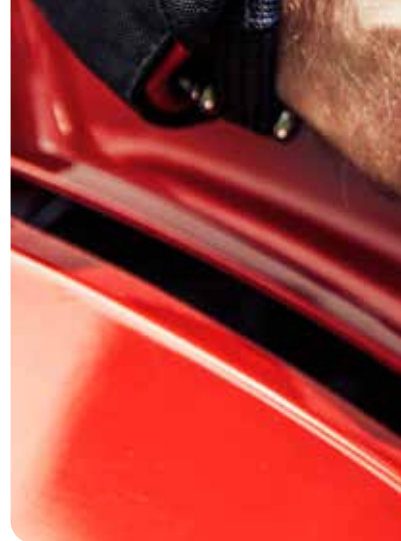

Working width	81 cm
For areas up to	6.000 m²

# PETROL RIDERS

**SMALL, PRECISE AND  
MANOEUVRABLE**

## MANOEUVRABLE AND FUN TO USE, WITH A GUARANTEED PERFECT FINISH

Our petrol ride-on mowers are comparable in terms of performance to that of classic lawnmowers. Their size makes petrol ride-on mowers dynamic and easy to manoeuvre around winding plots of land and the many obstacles you find in the garden. Ride-on mowers, with their narrow width, are the ideal choice for gardens with narrow passages. They are driven by a powerful AL-KO Pro or Briggs & Stratton engine. A high degree of ergonomics is achieved by means of the

comfortable adjustable seat, easy to use controls and the anti-slip steering wheel. The grass collector can be conveniently emptied using the telescopic lever and uses an acoustic signal to warn users when it is full. The Premium model R 7-65.8 HD boasts an infinitely variable hydrostatic drive with foot pedal, the option of reverse mowing at full speed and optimised steering thanks to special gearing.

## THE ADVANCED GENERATION OF OUR COMFORT PETROL LAWN TRACTORS

Our **COMFORT** petrol tractors have been a popular choice for many years now, and have been taking on a new look since the 2023 season. We are listening to our customers' thoughts and are continually improving our tractors. This has led to a new engine bonnet in an innovative design which has led to a new eye catching look of the **COMFORT** lawn tractors, we have also implemented

technical improvements associated with the grass collector. The improved box frame is the product of a wide variety of feedback from our long term customers. Quality and longevity are guaranteed with this product thanks to the key objectives "engineered in Germany" and "made in Austria". Take a look at the new generation of our **COMFORT** lawn tractors for yourself.

## INNOVATIVE DESIGN

We have revolutionised the design of our **COMFORT** tractors and adapted it to our new solo® by AL-KO design language. We have drawn on design elements from the automotive industry, such as long headlight glass and large radiator grilles.

## EXTREMELY USER FRIENDLY

Our **COMFORT** lawn tractors stand out with their high level of user friendliness. Durable components such as the foot operated hydrostatic transmission and electromagnetic blade brake clutch are used, which are able to engage and disengage the blades at any time without having to stop the engine. Indeed, using the lawn tractor is a breeze. Enjoy further benefits, such as the low access and extra long legroom. The controls can be easily accessed from the seat and feature an even more ergonomic design in the new generation.

## PRECISE STEERING AND WIDE TYRES FOR UNBEATABLE MOWING COMFORT

Our lawn tractors are very easy manoeuvre, thanks to precise steering components. Moreover, the large wheels provide great traction for the lawn tractor and do their very best not to leave their marks behind on the lawn: The bigger, the better. Our **COMFORT** lawn tractors have comparably larger wheels when set against competing products. Not to mention our **PREMIUM** lawn tractors' wheels are even bigger.

## IMPROVED BOX FRAME INCLUDING NEW PIVOT POINT

We have also increased the volume of the grass collector on our **COMFORT** lawn tractors to 250 litres. Thanks to the new pivot point, even less force is required to empty the larger grass collector. This pivot point is enabled by the improved box frame, to which we have also included an additional lock. This lock perfectly secures the box in the supporting arms, preventing it from accidentally falling out to the side. Attachment and removal of the collector box has also been considerably improved during this change.

## THE NEW GENERATION OF OUR PREMIUM PETROL LAWN TRACTORS

Our **PREMIUM** lawn tractors have been in use for years and are standing the test of time as versatile machines, and in the 2024 season they are absolutely eye catching. These new mowers let you experience the combination of unrivalled performance, maximum efficiency, maximum comfort and utmost versatility, while being rather eye catching. In addition to their new look and feel, the new workhorses also prove impressive with new technical improvements that we have

implemented based on feedback from our long-term customers. You'll be mowing to impeccable standards, overcoming almost anything in your way, regardless of whether you need to cover large areas or high grass or tackle steep slopes. The Smart Cockpit provides you with information about all the key aspects of the tractor or your mowing both during and after mowing. Why not give one of our smart and innovative **PREMIUM** petrol lawn tractors a whirl?

## UNRIVALLED PERFORMANCE

**PREMIUM** tractors are driven by extremely powerful engines, enabling you to overcome great challenges. Even thick grass shouldn't pose any issues. The Hydro-Gear® G700 transmission fitted on the T22-105.4 HD V2 SD and the T24-125.4 HD V2 offers the best performance over a long period of time, owing to its rugged cast aluminium housing and improved internal components, as well as solid 1" wheel shafts. The external oil filter makes the unit easy to maintain, while the integrated pump ensures that the main elements of the gearbox hydraulic system are always supplied with sufficient oil.

## MAXIMUM EFFICIENCY

From the 2024 season, we will maximise the efficiency of our **PREMIUM** lawn tractors thanks to the 2 km/h increase in speed (up to 13 km/h), the wide mowing deck (up to 125 cm) and MaxAirflow technology for the best way to transport into the high volume grass collector (310 litres). Perfectly combining these features makes our **PREMIUM** tractors the most efficient on the market. A larger grass collector means you make fewer trips to empty it, leaving you with more time to enjoy the finer things in your garden.

## UTMOST VERSATILITY

You are particularly versatile with our wide range of accessories, which you can use as you wish on the **PREMIUM** lawn tractors. With this in mind, take a look at our "**PREMIUM** exclusive" accessory solutions. Our wide range of accessories offers exactly what you need for your lawn tractor, precisely tailored to your demands and applications. The option of retrofitting all our **PREMIUM** lawn tractors with the Smart Cockpit is a rather smart choice. All **PREMIUM** rear collect lawn tractors can also be fitted with an electric tip kit for easy emptying of the collector.

## MAXIMUM ERGONOMICS

Alongside efficiency, we are also maximising the ergonomics of our **PREMIUM** lawn tractors for the 2024 season. For more reliable and faster adjustment of the mowing height, the height adjustment of the mowing deck is provided with a memory function that maintains the preferred cutting height. The pedals of **PREMIUM** lawn tractors are arranged parallel to each other, in a similar layout to your car, meaning you are able to respond quickly to any situation. Empty the large grass collector with the optionally available electric emptying kit, which enables you to open the grass collector with a single press of a switch.

# PREMIUM

## NEW DEVELOPMENTS FOR THE 2024 SEASON

### DESIGN

Discover our new design that offers the tractor a whole new visibility and dimension. The LED system is rather striking with its bright LED strips as permanent daytime running lights. The design incorporates our AL-KO design language and provides **PREMIUM** and **COMFORT** tractors with a uniform look. With its impressive dimensions, the new **PREMIUM** tractor looks like the big brother among lawn tractors. By further developing the design, we are also raising the competitive edge of our **PREMIUM** tractors. This new design sets the standard for future developments in the field of ride-on mowers.

INCREASED EFFICIENCY

GERMAN  
DESIGN  
AWARD  
WINNER  
2024

ENHANCED ERGONOMICS

## MULCH KIT, TOW HITCH AND PREMIUM BUMPER INCLUDED

All **PREMIUM** tractors come equipped with a mulch plug, this gives the flexibility to allow you to decide to either collect grass clippings or if you wish to insert the mulch plug with out the need for tools to cut and recycle the grass clippings directly in to the lawn. This gives additional nutrients back in to the lawn and encourages grass growth, however note you may have to cut your lawn more regularly this way as only 1/3rd of the grass should be cut at once when mulching. We are also including tow hitches with all **PREMIUM** tractors in 2024 to allow you to use our range of accessories around the garden. The **PREMIUM** bumper offers even more protection to the front of the tractor.

## LED LIGHTS INCLUDED

Fitted with LED wrap around head lights our **PREMIUM** lawn tractors ensure its always bright in front of you ! Styled to be like a car with running lights that are on all the time and then the option to put the lights to 'full beam' to give additional brightness when using the tractor early in the day or later in the afternoon.

## MEMORY HEIGHT OF CUT FUNCTION

Make your work easier with our memory function, which allows you to set the cutting height in a more reliable and faster manner. Save your preferred cutting height, ensuring you don't accidentally work at a different height. You'll love this feature, especially when you've plenty of work to tackle in the garden. The inspection window means you can always keep an eye on the cutting height. In contrast to our competitors, who only occasionally have such a solution in their product range and most of them involve complex adjustment, we offer convenient operation with a single handle.

## ARMRESTS\*

Discover our armrests - our response to the frequent customer request for comfort when working for longer periods, especially on large areas of land. Our armrests are height adjustable and enable each user to individually adjust them to their own requirements. The armrests can also be retrofitted on older seats, therefore expanding our range of accessories. We have even developed our own armrests for retrofitting our COMFORT tractors. It goes without saying that we have rigorously tested the stability - each armrest was loaded with 100 kg and was able to withstand this load.

\*Optional accessories

# PREMIUM SMART TRACTORS

Art. no. 127 710

## SMART COCKPIT

The Smart Cockpit is revolutionising lawn mowing, making the process more efficient and simple. Download the AL-KO inTOUCH App, place your smartphone in the sturdy holder (suitable for all 4" to 7" devices), connect your lawn tractor via Bluetooth® and then all the benefits of smart lawn tractors can be utilised.

For support in no time at all, simply contact selected retailers via the AL-KO inTOUCH App on the Smart Cockpit, who will be able to swiftly resolve the issue. The Smart Cockpit is also home to useful product videos, lists with accessories and spare parts, as well as digital manuals.

**RETROFITTING KIT FOR ALL  
PREMIUM  
TRACTORS FROM 2014**

### AS YOU MOW

The Smart Cockpit offers many benefits when operated from the tractor. Displayed details are:-

- ✓ **MOWING EFFICIENCY**, for the perfect cut
- ✓ **MAXIMUM MOWING TIME REMAINING**, which is calculated based on fuel consumption
- ✓ **SPEED**, which lights up red for low mowing efficiency in order to prevent any blockages
- ✓ **TRACTOR INCLINE**, as a safety recommendation for steep slopes
- ✓ **OPERATING HOURS**, to make servicing the machine much easier

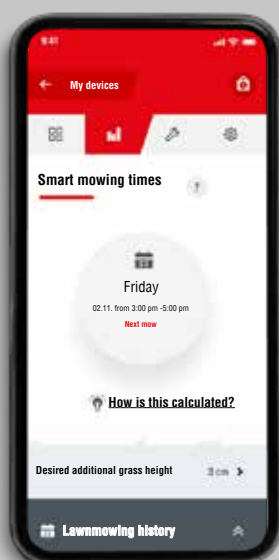

# SMART HELP

Our innovative inTOUCH App offers a wide range of useful features, designed to help you get the most out of your tractor. Are you starting your tractor incorrectly? Don't worry, you'll gain the right information to fix this problem.

What's more, you will receive notifications at defined maintenance intervals, such as for blade replacement or oil change. These reminders help to ensure that you never miss an important maintenance task again. Our service logbook gives you access to a list of recommended future maintenance tasks at any time.

To make maintaining your tractor even easier, you can conveniently track all previous maintenance activities. This way, you always have an overview of the inspections carried out and the service intervals. In addition, the app offers useful product videos, FAQs, suitable accessories and somewhere to store digital manuals. Furthermore, we enable you to have regular contact with your dealer via the app.

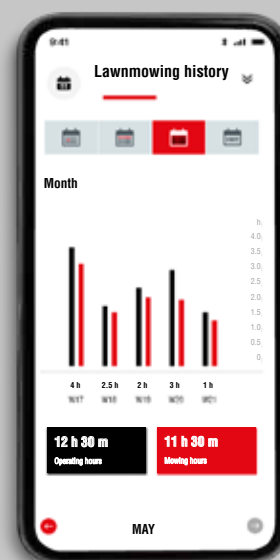

## INTELLIGENT SUGGESTIONS FOR FUTURE MOWING INTERVALS BASED ON:

- ✓ Garden location
- ✓ Weather forecast
- ✓ Garden conditions
- ✓ Operating mode, whether collecting or mulching

## MOWING HISTORY\*

- ✓ Hours per day, week, month or year
- ✓ Operating mode, e.g. driving time vs mowing time

\* Requires link to smartphone while mowing

# TRACTOR ACCESSORIES

## COMFORT BUMPER

EAN no. 400 371 835 3464

**Art. no. 119 658**

## PREMIUM BUMPER

Premium tractors from 2013

Comfort tractors from 2017

EAN no. 400 371 806 4988

**Art. no. 127 731**

## ARMRESTS

**COMFORT** from 2017

EAN no. 400 371 806 4995

**Art. no. 127 732**

**PREMIUM** from 2013

EAN no. 400 371 806 4971

**Art. no. 127 730**

## RETROFITTING KIT FOR LED LIGHTS

EAN no. 400 371 835 5116

**Art. no. 119 832**

## MULCHING KIT FOR 93 / 95 CM

EAN no. 400 371 834 5643

**Art. no. 118 885**

## MULCHING KIT FOR 103 / 105 CM

EAN no. 400 371 835 3440

**Art. no. 119 656**

## MULCHING KIT FOR 125 CM

EAN no. 400 371 835 2979

**Art. no. 119 605**

## LAWN ROLLER GW 100\*

Working width: 98 cm

Working weight:

140 kg (water), 235 kg (sand)

EAN no. 576 972 033 0617

**Art. no. 130 539**

## TOW HITCH

**COMFORT**

EAN no. 400 371 835 5109

**Art. no. 119 831**

**PREMIUM**

EAN no. 400 371 835 3006

**Art. no. 119 608**

## DEFLECTOR

**COMFORT**

EAN no. 400 371 805 9281

**Art. no. 127 488**

**PREMIUM**

EAN no. 400 371 835 2986

**Art. no. 119 606**

## SPREADER SP 60\*

Capacity: 56 l

Spread range: 2-5 m

EAN no. 400 371 806 1932

**Art. no. 113 874**

**SPEAK TO YOUR LOCAL  
DEALER TO GET THE  
CORRECT ACCESSORIES  
FOR YOUR TRACTOR**

## **PREMIUM** *exclusive*

### **MEMORY FUNCTION**

Premium tractors from 2013  
EAN no. 400 371 806 4957

**Art. no. 127 740**

### **CRUISE CONTROL**

Improved control  
Premium tractors from 2013  
EAN no. 400 371 806 4964

**Art. no. 127 729**

### **ELECTRIC GRASS COLLECTOR EMPTYING**

Premium tractors from 2013  
with grass collector  
EAN no. 400 371 835 2948

**Art. no. 119 602**
