The force of water and pressure: a double-bladed aid for maintenance of the open spaces you love.

our **power**, your **passion**

# The force of water and pressure: a double-bladed aid for maintenance of the open spaces you love.

The secret behind **Efco** high-pressure washers lies in the sheer power of water backed up by the force of high pressure. The latest materials and manufacturing methods ensure **Efco** high-pressure washers deliver **hygiene, cleanliness and optimum results**. Ideal for household uses, with their impressive cleaning force and innovative styling **Efco** high-pressure washers combine **power and manageability** to bring convenience and practical advantages around the outside of the home, in the garden and in the garage.

❖ Axial 3-piston pump with thermal protection.

❖ Temperature control thermostat, on hot water model only (max 90°C).

❖ Self-priming pump and combustion engine, for jobs in places lacking an electrical power outlet.

❖ Water suction quick fitting.

❖ Easy transport thanks to large size wheels.

❖ Practical handle for easier movement.

❖ Removable detergent tank with externally visible liquid level.

❖ Practical housings to ensure accessories are always in easy reach.

## The new Efco range of high-pressure washers meets the needs of all users. The new machines are available in different models designed to match different requirements.

### High-pressure washers for home use

Designed to offer convenience and practicality for use outside of the home, in the garden or in the garage.

### High-pressure washers for professional use

Efficiency and practicality for intensive use. The petrol engine model offers additional advantages for access to a power point.

### Professional high-pressure washers

Designed in compliance with stringent standards for cleaning large areas (courtyards, patios) and for cleaning large floor spaces and walls, combining the cleaning power of hot water.
